

The image shows an outdoor experimental setup. In the foreground, a wooden table holds a small black electronic device with a red light and an antenna, mounted on a wooden board. A white label with black text is attached to the table. Behind the table, a metal structure with a horizontal arm and a white box is visible. The ground is covered with large, grey, diamond-plate metal sheets. The background features a dry, grassy field, some trees, and a building with a satellite dish.

PBC Beacon

The image shows a wooden table with a sensor assembly mounted on top. The assembly includes a white box, a black box, and a vertical pole with a sensor head. The table is on a circular metal base. A white label with the text 'Precyse PBC Beacon' is attached to the front of the table. The background is an outdoor area with a concrete floor and some vegetation.
